

2024 USG Wheat Harvest Reporting

Please use the enclosed form to report your USG wheat inventory (This will be emailed to those who have email). If you are still harvesting, please send in as soon as your harvest is complete. The enclosed Wheat Tagging Chart has updated tagging numbers for fall 2024 sales. Please use these numbers from this point forward.

Only USG 3118 may be kept by the farmer. All other lines are QA and have either PVP non title 5 or a breeder patent on them.

You will notice the section at the bottom of the harvest report pertaining to harvest equipment cleaning records. Please check boxes, date, and sign.

Please notice the column on the far right. Please fill this in if you know you will need more of the variety in that row or will have some extra to transfer or wholesale. You may also put GOOD if you have just enough. This will aid the USG office in moving wheat to where it is needed. If you want us to try to move any extra on the wholesale market please let us know as soon as you can.

Call 800-505-3133 or email for more information.
